

# WHAT ON EARTH ARE YOU DOING?

Eavesdrop as Bishop Sally Dyck and her niece, Sarah Erhman, a science teacher both ask and answer questions about the connections between our Christian faith and our care of God's creation.

In *A Hopeful Earth*, their back and forth dialogue examines the impact each Christian steward has on the Earth through: our continual purchases of manufactured products, our consumption of natural resources, energy use, water use, food choices, and much more.

As Sarah Erhman summarizes, "If I were God, I'm not sure I'd want the folks who trashed creation to come live with me for eternity."
