

Only a Gibson Is Good Enough.

The Jimmy Page Les Paul

Gibson
USA

Jimmy Page's latest composition cannot be found on a CD, tape, LP, or sheet music. This innovative masterwork is instead forged with fine woods, steel and gold. The new Jimmy Page Les Paul is a personally tailored artistic expression from the heart and soul of a music legend. Gibson and Jimmy Page have worked more than five years to design this first Les Paul Signature Series guitar produced since the 60's.

The new Jimmy Page Les Paul is based on the classic Les Paul he has played for many years. That heritage is combined with technical updates which give this Signature Edition a diverse spectrum of 21 unique sounds: more sounds than ever before possible from a single guitar. At the same time, the famous Les Paul tone is preserved by treble and rhythm humbuckers.

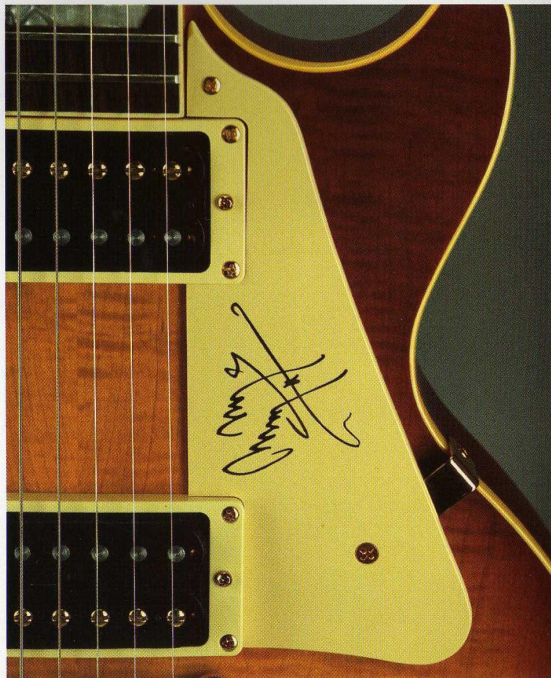

Page's new guitar has a light Honeyburst finish over a flamed maple top, conditioned with a vintage antique hue to give it the look of a newly discovered, untouched classic preserved from the 50's. The fast playing neck is uniquely designed with a variable compound radius, which duplicates the exact dimensions and comfortable feel of Page's own Les Paul.

As soon as you pull it out of the case, and cradle the custom neck of a Jimmy Page Signature Edition, you will recognize that familiar comfortable feeling of an old friend you have carried around for years. You will experience the heritage of a Rock & Roll legend. After all, this is Jimmy Page's Les Paul!.....his gift to you.

21 Killer Sounds on One Page
