

Morgan SPAS

Building Reliability
For More Than
28 years

MORGAN QUALITY CRAFTSMANSHIP

Morgan Spas are built one at a time, with the finest materials and the highest standards of quality. We take pride in the personal touch, which you can see and feel in every detail from the hand-crafted cabinet, to the smooth touch of the beautiful marbled acrylic water vessel.

True craftsmanship goes beyond men and materials. Fine workmanship has a certain style of its own, which is instilled in the creation of a precision timepiece, a hand-made violin, or a superbly engineered automobile. At Morgan, we express this same philosophy of fine craftsmanship in our spas.

Morgan builds spas to last a lifetime. Years of testing, refining and responding to customer suggestions have culminated in a Morgan Spa that is state of the art. You will enjoy a lifetime of performance with minimal maintenance.

Morgan Spas offers quality without compromise.

MORGAN SPA SENSATIONS

Only Morgan gives you complete control over an infinite variety of spa settings for the exact hydrotherapy sensations you desire.

On a Morgan Spa you can precisely adjust a wide array of performance functions to your body position and therapeutic preference. You control:

- Adjustable Jet Pressure
- Water Temperature
- Adjustable Air Speeds & Volume
- Jet Direction
- Bubbling Action
- Variable Turbo Charging
- Air/Water Mix
- Air Temperature
- Jet Spin Action
- Random Massaging Action

From neck to foot, you can direct the infinitely adjustable battery of jets on a Morgan Spa.

Have a spa experience tailored just for you. Feel the soothing rush of warm water with pulsating power to massage your muscles and melt away stress.

Lay back and feel the caresses of soothing warm water laced with thousands of exploding bubbles. Relax and allow your entire body to be kneaded by our wide array of hydrotherapy jets.

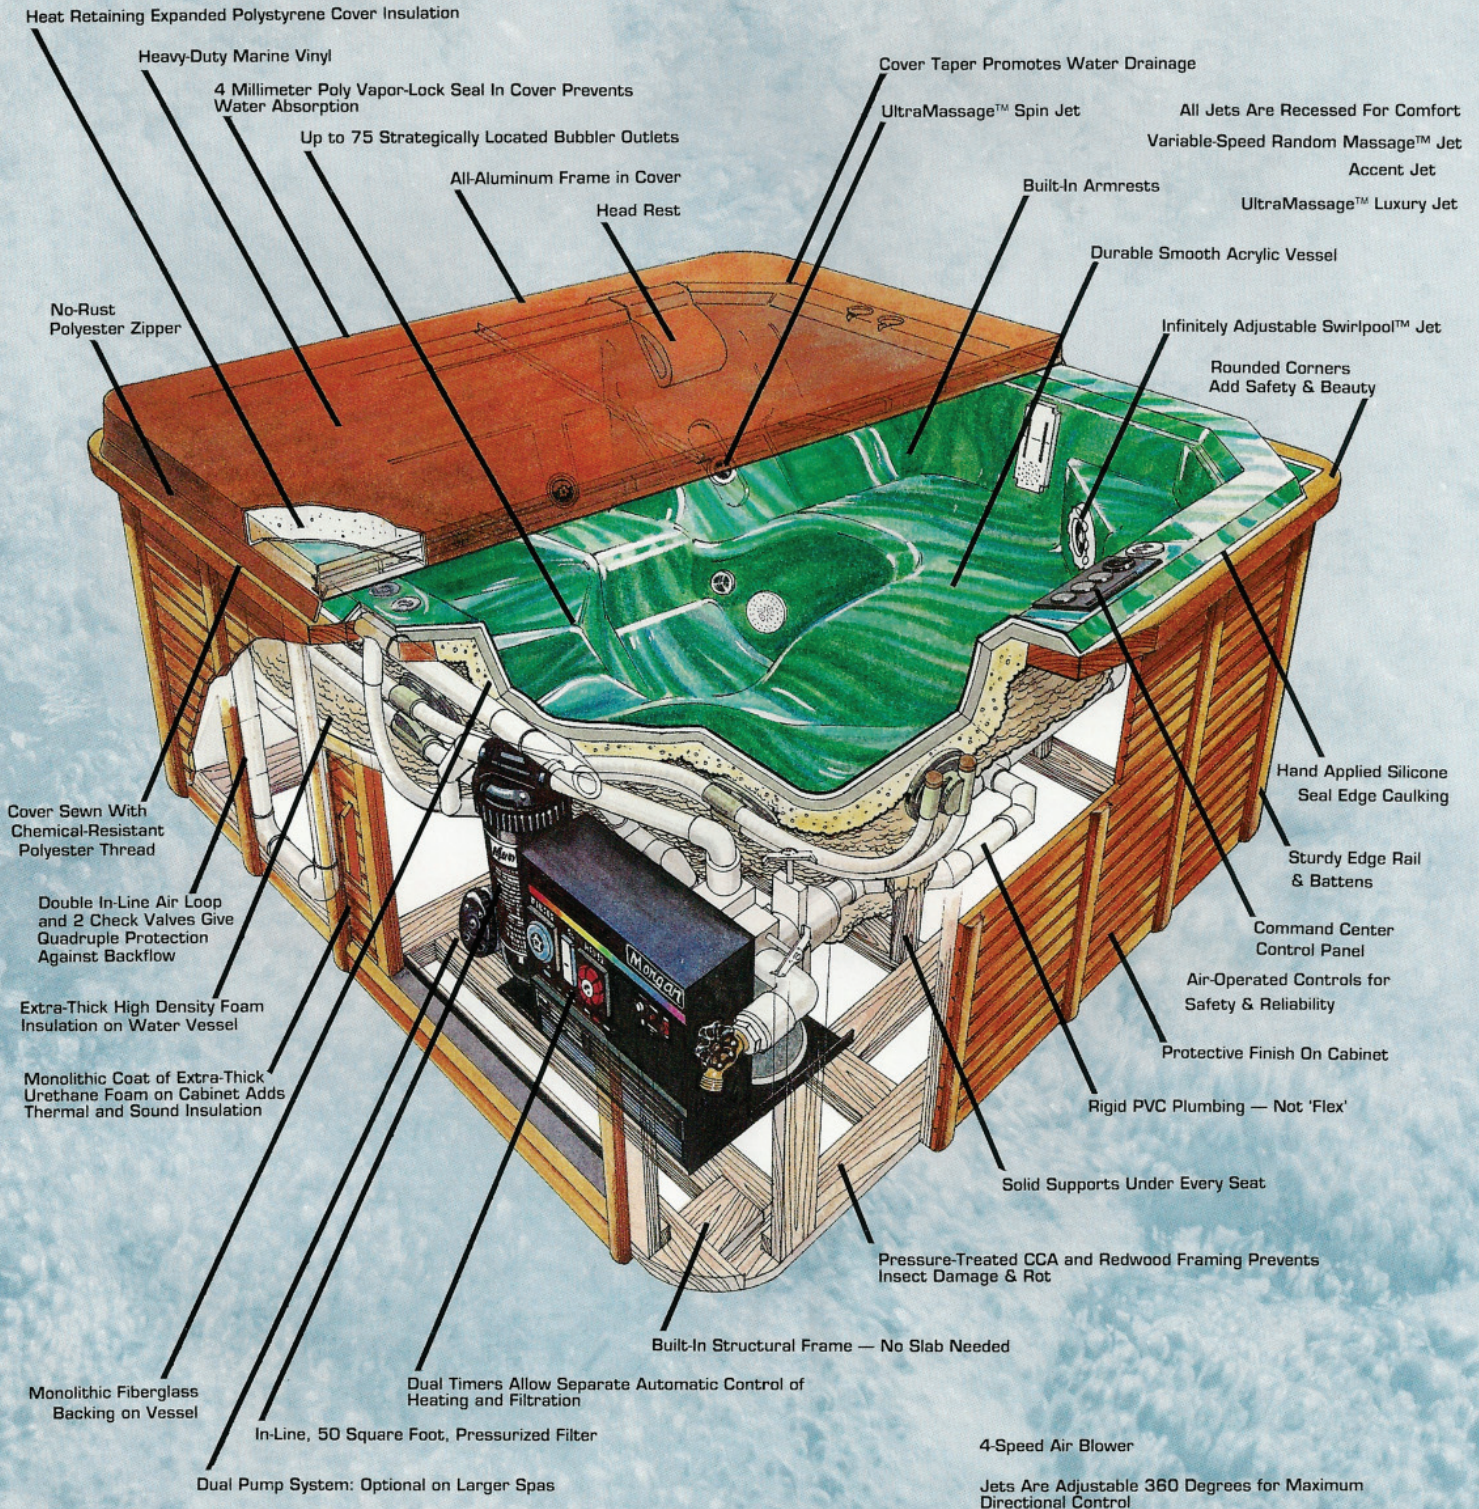

A QUALITY EXAMINATION

When you compare spas, be sure to check:

1. Quality of the materials and components.
2. Quality of the craftsmanship.
3. Reliability and reputation of the manufacturer and dealer.

At Morgan, we've been building our reputation of integrity for over 28 years. Compare these features with any spa on the market today:

Morgan Spas offers you the industry's finest guarantee, a 10-Year Limited Warranty. We stand behind every product we sell. We invite you to examine a complete copy of our warranty, at any Morgan Spas showroom.

EXCLUSIVE MORGAN SPA FEATURES

4-SPEED AIR BLOWER

Morgan's exclusive 4-Speed Air Blower allows you to regulate air pressure and speed to a variety of settings, from low to high, giving you the degree of bubbling action you desire.

DUAL CONTROLS

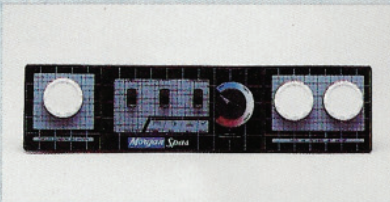

Only a Morgan Spa offers a second set of controls which give you the convenient option to change jet and blower functions from any seat.

VARIABLE TURBO CHARGER

Morgan Spa jets can be Turbo-Charged for the highest force output combination of water and air thrust. The Morgan Variable Turbo Charger directs air from the 4-Speed Air Blower into the water jets, at any proportion you choose.

10 YEAR GUARANTEE

The finest guarantee in the industry, and it is backed by a national company with a 28 year history of reliability.

COMMAND CENTER CONTROL

Adjust every spa function, including air induction, temperature, jet action, lighting, 4 Speed Air Blower action and variable turbocharging while seated in your spa! All controls are air actuated for safety. No electricity is present at any topside control.

RIGID PVC PLUMBING

Provides exceptional durability and stability; the same plumbing used in new home and office construction. Rigid PVC is better insulated and much stronger than the more common, weaker and cheaper "Flex" hose.

STRUCTURAL CABINET SUPPORT

Morgan's cabinet is designed to handle the weight of the water, plus the shifting weight of multiple users.

This built-in strength eliminates the need for a concrete slab.

The structural frame is manufactured using pressure treated CCA lumber designed for ground contact.

Many other spas have "skirts" which are decorative in nature and may fail if sudden or excessive weight is applied at the spa edge.

SLIDING ACCESS DOOR

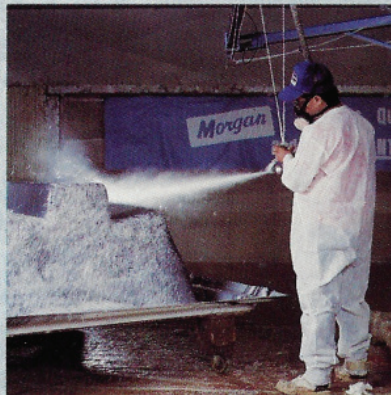

The redwood cabinet features an exclusive sliding door, providing convenient access to the Power Pack. There are no door panels to lift or remove.

IN-LINE FULL FLOW PRESSURIZED FILTER

Provides positive 100% filtration of water. Keeps spa water sparkling clean. Spa Filter design allows easy removal and cleaning of the oversized 50 square foot filter. Filter canister can be easily taken off and emptied completely.

DUAL PUMP SYSTEM

Available option on larger spas. Two extra large pumps give superior jet action for full force massage.

SOLID ONE-PIECE ACRYLIC VESSEL

Custom-molded by Morgan, thermoformed to perfect contours, and integrated with a multi-step fiberglass and resin reinforcing process for maximum strength.

COMPLETELY SELF-CONTAINED

Everything you need to operate your spa is contained within the spa cabinet. No water supply or drain hook-up is needed. Just connect to a power supply, add water, and your spa is ready to enjoy.

FINEST REDWOOD CABINETRY

Hand-milled and assembled from clear, **All Heart** Alerce Redwood, one of the strongest most weather-resistant woods in the world. Alerce Redwood has a uniform texture, a straight grain, a rich color, and a fine finish. American Forests Magazine says, "The wood of Alerce is probably one of the best in the world, if not the best. It is practically exempt from decay and resists any temperature..." Alerce Redwood is a renewable resource in great abundance.

INSULATED CABINET & VESSEL

The acrylic spa vessel and cabinet interior are sprayed with a thick monolithic coat of high density polyurethane foam. This procedure creates an enclosed air space for thermal and sound insulation, yet allows easy access to all plumbing.

The warm air generated from the equipment pack and hot water plumbing is captured in the insulated cavity between the vessel and cabinet. At the touch of a button, Morgan's 4-Speed Air Blower injects thousands of warm air bubbles into your spa at variable speeds and temperatures.

DUAL-TIMER POWER PACK

Designed and built by Morgan, it features dual timers which you can set to filter, save energy, sanitize and pre-heat your spa to be ready whenever you are.

Silver Marble color

THE PRIVATE CLIMATE ROOM

Morgan's Private Climate Room offers the ultimate spa experience.

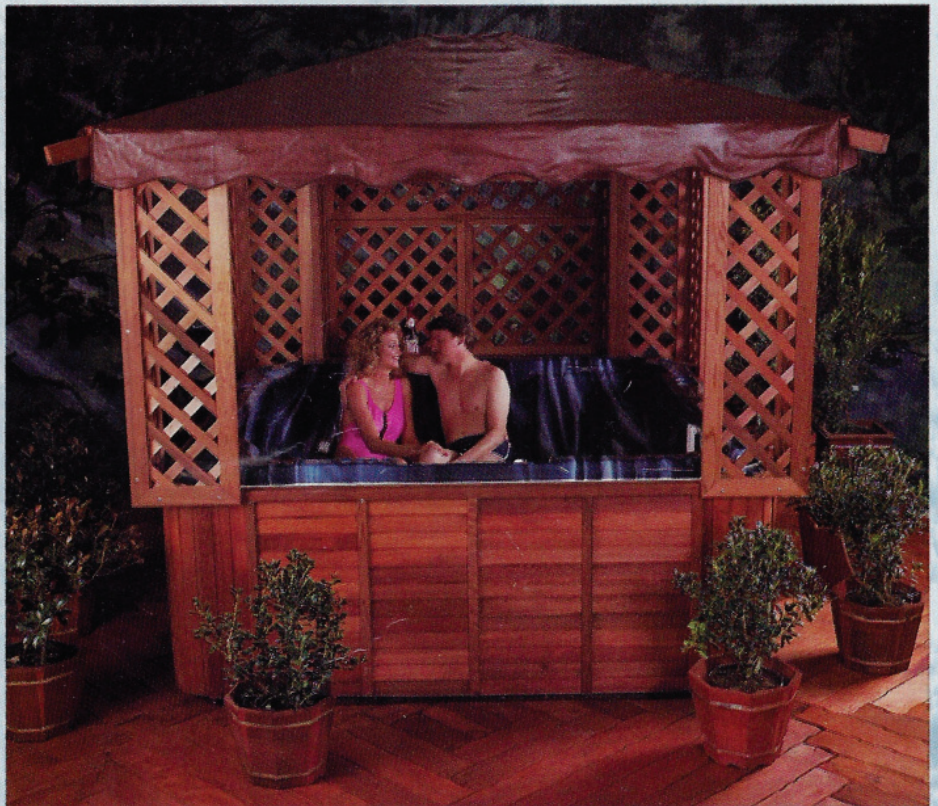

Sliding redwood panels can be opened for gentle spring and summer breezes, or closed on all 4 sides to give you complete privacy and an enclosed environment of warmth.

THE SPAZEBO

Add a touch of elegance with the Morgan Spazebo, a redwood gazebo which is custom designed to fit on your Morgan Spa. It is available as an option on every Morgan Spa model.

The Morgan redwood Spa-Side Caddy is an additional option available with the Spazebo. It features a row of stemware holders and a convenient snack and beverage bar.

WHIRLPOOL BATHS

Morgan now makes a daily therapeutic spa experience even more convenient with our designer line of whirlpool baths. You can enjoy the invigorating pleasure and relaxation of spa massage in your bath.

Morgan offers 14 whirlpool bathtub models, in a wide variety of sizes and shapes, for one or two people. Morgan Whirlpool Baths are designed to fit within your present bath space, or a remodeled bath area.

Choose from 29 designer colors to match or accent your bathroom color scheme.

Your whirlpool bath comes fully equipped with adjustable hydrotherapy jets, air controls, pump, and plumbing.

Enjoy the ultimate in luxury indoor spa bathing from Morgan.
